Documentación de cambios servidor Entropia

13/01/06 – 4:25PM

Adquisición VPS Webdock

Good job! ✕

Congratulations! You have now provisioned a Webdock server with a clean and minty fresh operating system. You should now **create your first Shell User** so you can gain SSH access to the server.

Username e.g. "admin"

entropia

Password

🚫 plokoploko | **Suggest Password**

Password can only contain letters (a–z, A–Z) and numbers (o–g).

Your shell user will be added to the **sudo group** and the shell will be **/bin/bash**. If you want to customize this, add the user on the Shell Users screen instead.

Please note: Once you have added at least one Shell User you can log in directly using our WebSSH terminal by clicking the ⌨ icon. Once logged in, execute **"sudo su"** to become root. You should never enable direct root login with password authentication. Read more about shell access and root login on Webdock here.

I Will Do This Later | **ADD SHELL USER ➤**
